ABOUT ME

UI/UX Designer with a strong understanding of user needs and digital design principles. Experienced in creating wireframes, prototypes, and interactive interfaces that enhance usability. Adept at working in agile teams and collaborating with developers to deliver functional and visually appealing digital products

PROFESSIONAL EXPERIENCE

Research & Development Team Lead at ScienceUtsav Educational Services Pvt. Ltd.
Bengaluru | July 2025 – Present

- Spearheading a cross-functional team to improve the design, delivery, and user experience of educational kits and STEM-based training programs.

Research & Development Associate at ScienceUtsav Educational Services Pvt. Ltd.
Bengaluru | July 2023 – June 2025

- Designed "Roboscientist", an intuitive educational automation kit using Arduino, with an emphasis on user-friendly interaction and hands-on learning.
- Developed clear, engaging, and accessible curriculum materials and simplified Arduino programming content for diverse age groups.
- Conducted interactive workshops enabling students and educators to build real-world physical models focused on solving local community problems.
- Created digital content for social media, websites, and promotional platforms, aligning with UX/UI principles to attract and engage users.

Design Freelancing

February 2023 – June 2023

- Worked as a freelancer, designing intuitive UI/UX for a web portal and a mobile application. Created visually appealing and user-friendly interfaces, enhancing user experience and engagement. Focused on responsive design, accessibility, and seamless navigation for optimal usability.

PROJECTS

Auction App for Art Gallery

Designed an intuitive mobile interface allowing users to browse and bid on artwork effortlessly. Focused on enhancing user engagement through seamless navigation and real-time bidding history
